

A

NIGERIA COMPUTER SOCIETY NATIONAL INFORMATION TECHNOLOGY WHIZKIDS COMPETITION

Name of School:

1. The two kinds of main memory are

A	B	C	D
Primary and secondary	Random and sequential	ROM and RAM	All of above

2. Integrated Circuits (Ics) are related to which generation of computers? A light goes on when caps lock is on

A	B	C	D
First generation	Second generation	Third generation	Fourth generation

A

3. A hybrid computer is

A	B	C	D
A digital computer	An analogue computer	Both a digital and analogue computer	None of the above

4. Chief component of first generation computer was

A	B	C	D
Transistors	Vacuum Tubes and Valves	Integrated Circuits	None of above

5. Which of the statements is correct about a cathode ray tube VDU?

A	B	C	D
It is an output device	It is an input device	It is a storage device	It accommodate sound card

6. Small computers that are not microcomputers are classified as

A	B	C	D
micro computers	mainframe computers	mega processors	mini computers

7. Input and Output devices such as monitors and keyboards are classified as

A	B	C	D
----------	----------	----------	----------

arithmetic units	control unit devices	peripheral devices	main store devices
------------------	----------------------	--------------------	--------------------

8. Line printers, voice synthesizer and computer terminal screens are classic examples of

A	B	C	D
logic circuit devices	analogue circuit devices	AND gate devices	output devices

9. Silicon piece with a system circuit on it is termed as

A	B	C	D
chip	circuit	logical gate	circuit network

10. Large computers with wide range of peripheral devices are classified as

A	B	C	D
mainframe computers	mini frame computers	mainframe processors	peripheral interface

11. A program on a computer that allows the user to create, edit, view, print, rename, copy, or delete files, folders, or an entire file system

A	B	C	D
File Type	Application	File Management	Operating

12. The action of gaining access to a computer or a network by entering a username and password is known as ----

A	B	C	D
Application	Logon	Enter	Memory

13. Computer chips that store data and programs while the computer is working is called ---

A	B	C	D
Input device	Output device	Storage device	Memory

14. ----- are additional hardware that are not necessary for a computer to function, but does enhance how the computer can be used

A	B	C	D
Input device	Output device	Storage device	Peripheral devices

15. A newly created file that is to be saved for the first time in Microsoft word uses the command -

A	B	C	D
Storage device	Save	Save as	Save in

16. MIS is designed to provide information needed for effective decision making by?

A	B	C	D
consumers	workers	foremen	Managers

17. A computer program that converts an entire program into machine language is called a/an

A	B	C	D
Interpreter	Simulator	Compiler	Commander

18. A computer program that translates one program instructions at a time into machine language is called a/an

A	B	C	D
Interpreter	CPU	Compiler	Simulator

19. Unwanted repetitious messages, such as unsolicited bulk e-mail is known as

A	B	C	D
Spam	Trash	Calibri	Courier

20. COBOL is widely used in applications

A	B	C	D
Commercial	Scientific	Space	Mathematical

21. CLI stands for_____

A	B	C	D
Commandment Line Interface	Command Line Interaction	Command Line Interface	Command Linear Interface

22. GUI stands for_____

A	B	C	D
Graph User Interface	Graphical User Interface	Graphics User Interface	Google User Interface

23. A set of rules which govern the conduct or behavior of computer professionals in the use of Computing systems resources is called_____

A	B	C	D
----------	----------	----------	----------

Computer Rules	Computer commandment	Ethics for Computing Professionals	Computer Protocols
----------------	----------------------	------------------------------------	--------------------

24. HTTP stands for _____

A	B	C	D
Hypertext Transmission Protocol	Hypertext Transport Protocol	Hypertext Transfer Protocol	Hypertext Transportation Protocol

25. URL stands for _____

A	B	C	D
Universal Reform Locator	Universal Resource Location	Uniform Resource Locator	United Reform Location

26. BCD stands for-----

A	B	C	D
Binary Coded Decimal	Binary Coded Digitals	Binary Characters Decimals	Binary Conducting Decimals

27. The number of bits the processor can transmit at a given time is called:

A	B	C	D
Bus width	Word size	Access time	Channel speed

28. In order to view pages on a web site, the user needs to enter the site address called:

A	B	C	D
Uniform resource locator	Email address	Postal address	MAC address

29. Process of reading data from permanent store and writing it to computer's main store is called

A	B	C	D
Saving data	Loading data	Writing data	Reading data

30. The meaning of WWW is-----

A	B	C	D
Wide Web World	Wide World Web	Web Wide World	World Wide Web

31. One thousand bytes represent a-----

A	B	C	D
----------	----------	----------	----------

Megabyte	Gigabyte	Kilobyte	Byte
----------	----------	----------	------

32. A step by step procedure used to solve a problem is called

A	B	C	D
operating system	Algorithm	application program	process

33. A computer can be defined as an electronic device that can be(choose the most precise definition):

A	B	C	D
carry out arithmetical operation	carry out logical function	accept and process data using a set of stored instructions	present information on a VDU

34. The Central Processing Unit:

A	B	C	D
is operated from the control panel	is controlled by the input data entering the system	controls the auxiliary storage unit	Controls all input, output and processing

35. Computer follows a simple principle called GIGO which means:

A	B	C	D
garbage input good output	garbage in garbage out	great instructions great output	good input good output

36. A bootstrap is:

A	B	C	D
a memory device	a device to support the computer	a small initialization program to start up a computer	an error correction technique

37. Which of the following is not hardware:

A	B	C	D
Magnetic tape	printer	VDU terminal	Assemblers

38. An operating system

A	B	C	D
is not required on large computers	is always supplied with the computer	is always supplied with the BASIC	consists of programs that help in the

			operation of computer
--	--	--	-----------------------

39. The Internet uses the following protocol:

A	B	C	D
TCP/IP	IPX/SPX	UDP/IP	TCP/UDP

40. Internet users connect to the _____ of the desired ISP

A	B	C	D
Hard disk	gateway	RAM	ROM

41. ECG machine is an example of

A	B	C	D
Discrete Computer	Analogue Computer	Hybrid Computer	Digital Computer

42. Which of the following are often cute, funny or curious and make you want to pass them on? _____

A	B	C	D
Posts	Memes	Dooced	Sockpuppet

43. Mainframe computers were developed in

A	B	C	D
1960s	1950s	1940s	1930s

44. The clock rate of a processor is measured in _____

A	B	C	D
milliseconds	megahertz	megabytes	nanoseconds

45. Minicomputer is physically bigger compared to

A	B	C	D
Mainframe Computer	Micro Computer	Super Computer	None of the above

46. PDP VAX 7500 is an example of

A	B	C	D
---	---	---	---

Micro Computers	Mini Computers	Mainframe Computers	None of the above
-----------------	----------------	---------------------	-------------------

47. Micro Computers are also called

A	B	C	D
Personal Computers	Game Computers	Dedicated Computers	None of the above

48. Notepad and palmtop are examples of

A	B	C	D
Mainframe Computer	Mini Computer	Miro Computer	None of the above

49. _____ is an email chain letter that warns of impending viruses and tries to scare users into forwarding and continuing the prank email

A	B	C	D
Hoax	Sockpuppet	Dooced	Troll

50. Physical component of the computer is referred to as

A	B	C	D
Hardware	Software	Humanware	None of the above

MODEL ANSWERS

1. A

2. C

3. C

4. B

5. A

6. D

7. C

8. D

9. A

10. A

11. C

12. B

13. D

14. D

15. C

16. D

17. C

18. A

19. A

20. A

21. C

22. B

23. C

24. C

25. C

26. A

27. B

28. A

29. A

30. D

31. C

32. B

33. C

34. D

35. B

36. C

37. D

38. D

39. A

40. B

41. C

42. B

43. C

44. B

45. B

46. B

47. A

48. C

49. A
